Jacopo Castri

Junior Developer

About Me

I'm a 20-year-old Italian developer with a strong foundation in computer science. I am currently pursuing a degree in Computer Science at university after completing my studies at a scientific high school.

I enjoy working on personal projects, researching artificial intelligence, and transforming ideas into useful outcomes. I'm particularly interested in cybersecurity, low-level programming, and problem-solving. Motivated and curious, I always strive to improve my skills and take on meaningful challenges.

I value collaboration, adaptability, and creative problem-solving, and I firmly believe that advancement comes through teamwork and knowledge sharing

Education History

2024
High School Diploma
Scientific High School, Italy

Degree in Computer Science – **Ongoing**

Languages

Italian
Native language

English
B2 Level

Relevant Skills

Programming Languages
- Python
- C / C++
- Java
- JavaScript
- SQL
- HTML / CSS

Low-Level Programming
- MIPS Assembly
- Motorola 68k

Artificial Intelligence
- Experience with AI models
- Prompt engineering and AI image generation

Cybersecurity
- Web vulnerabilities
- Penetration testing
- Bug bounty contributions

Tools & Platforms
- Git
- VS Code
- Linux

Work Experience

I don't have formal work experience yet, but I have contributed to bug bounty programs, built websites for private clients, and developed personal projects exploring AI, low-level programming, and web development. These experiences helped me strengthen my skills, solve problems, and create practical solutions.

Soft Skills

- Teamwork & collaboration
- Analytical problem-solving
- Self-motivation & curiosity
- Adaptability & continuous learning
- Creative and innovative mindset
- Attention to detail

Certifications

2023
English B2 Certified

2025
Cybersecurity Fundamentals
